MISSION OF THE DISTRICT

The mission of the Copiague School District is clear:

Within the culturally and ethnically diverse community that is Copiague, the public schools occupy a unique position. It is our responsibility, in partnership with parents and the community, to enable every student to reach high levels of individual academic achievement, to acquire the sophisticated skills necessary for life and work, and to become informed, concerned citizens of a rapidly changing, inter-dependent society.

To achieve its mission, the district is committed to ongoing efforts aimed at setting and maintaining high expectations for all students and building the capacity for all students to succeed. This is done within a systemic K-12 framework which acknowledges the academic, physical, and social development of pupils in distinct stages over time and the expectations of local, state, and national learning standards.

Of critical importance to the district's comprehensive effort is the role of its guidance and related services components for students, parents and teachers alike. The explanation and coordination of these responsibilities K-12 are articulated in this Guidance Plan. It is intended to assist educational stakeholders in assuring the academic and social success of all pupils.

SCHOOL GUIDANCE

The Copiague School District Guidance Department fully supports the district's mission.

To do so, it seeks to:

- Ensure school success for all students as the outcomes of all counseling efforts.
- Provide timely and effective communication with students, parents, and teachers on all matters.
- Continuously educate constituents as to the expectations of the Copiague school experience including graduation requirements, assessment standards, and the breadth of opportunities created by school programming.
- Provide and support career and college education awareness and planning at all levels.
- Coordinate counseling, consulting, and related service efforts of all support personnel within the school district.

****The Guidance Plan will be reviewed annually to ensure compliance with the New York State Education Department Regulations*****

ROLE OF THE SCHOOL COUNSELOR

In the Copiague School District, the role of the school counselor is to support the **Grade K-12 School Guidance and Counseling Program** by facilitating student development in academic, career and personal/social areas. The school counselor is a trained and certified professional, who works with students, administrators, teachers, parents and the community to promote a safe and successful learning environment. The school counselor assists all students within the educational program to become effective learners, responsible citizens, and contributing members of society. On-going communication and information exchange with parents/guardians are vital to all aspects of the School Guidance and Counseling Program and is a key component of the counselor's role.

School counselors plan, implement and evaluate developmental **guidance curriculum** programs that address the needs and priorities of their individual schools. Their work is further differentiated by attention to age-specific developmental stages of student growth, and by the needs, tasks, and student interests related to those stages.

School counselors coordinate **individual student planning** which consists of ongoing systemic activities designed to help individual students establish personal goals and develop future plans.

School counselors deliver **responsive services** to students to meet their immediate needs and concerns. These services can be delivered through such strategies as consultation, individual and small group counseling, crisis counseling, referrals, and peer facilitation.

Counselors incorporate organizational processes and tools to ensure the program is structured, concrete, clearly delineated, and reflective of the school's needs. These processes and tools further ensure that the primary focus of the professional school counselor's time is the delivery of direct service to students.

School counselors are involved regularly in updating and sharing their professional knowledge and skills. They consult and collaborate with colleagues, parents, and administration in order to provide information to support the school community and to receive feedback on the emerging needs of students.

Professional Development

The Guidance Counseling Staff understands and promotes the importance of professional development. Membership in and attendance at events developed by professional organizations, helps to provide the counselors with new and innovative suggestions to continually evaluate and improve their program.

Counselors are committed to supporting the counseling profession by sponsoring internships through area universities. Counselors take advantage of professional development opportunities that will enhance their college and career exploration skills, as well as the understanding of the changing NYS regulations.

The Guidance Departments, at all levels, enjoy the opportunity to grow and develop through professional development experiences.

Transitions

Entering a new school year can be very challenging for students and their parents. In an effort to assist students new to the district and those who are transitioning from one district school to another, each building's administration team has developed a series of orientation programs.

District information is disseminated through a series of evening parent programs and classroom presentations for students. Programs such as the 5th to 6th Grade Orientation, 8th to 9th Grade Orientation and the New Entrant Orientation are designed to help students transition successfully. Parent meetings are hosted to discuss school expectations, procedures, and the important role they play in helping their children attain optimal academic success.

Careful attention is given to the placement of students and focuses on early identification of students who may be "at risk" so that appropriate early intervention strategies may be put in place. The new entrant routing form is used for students in grades 6-12 to obtain academic, behavioral and attendance history.

College & Career Planning

The goal of the K-12 counseling program is to prepare students for life after Walter G. O'Connell Copiague High School. This process involves making parents and students aware of academic requirements as well as providing appropriate and rewarding school-to-career experiences to students. The middle school and high school counselors provide transitional programming at every stage. The ultimate goal is to ensure a successful adjustment from high school to college, the military or post-secondary employment. Developing career awareness, utilizing Naviance software and other resources, begins at the middle school level. College/career fairs, the processing of college applications, and providing students access to military and college representatives contribute to a comprehensive school-to-career program.

Copiague Public Schools

Transitioning Children and Youth Neglected, Delinquent, or At-Risk of Withdrawal

The Copiague Public schools has established an outcome-oriented process that is reasonably calculated to promote the successful movement from the community to a residential or correctional program setting, and from a residential or correctional program setting to post-residential or post-incarceration setting.

The District identifies three elements of successful transition:

1. It must promote successful movement between the facility and the community.
2. It must take a team based approach to developing coordinated activities as part of the process
3. It must involve parents and family members in improving the educational achievement and school attendance of transitioning students and/or preventing the involvement of their children in delinquent activities.

Successful movement between the facility and the school community requires timely registration and re-entry to the district school, awareness of all the systems and policies in place to help support the youth in navigating these systems, and also requires successful movement of records and processes to support the youth in acquiring appropriate academic, career and technical, behavioral, social, and independent-living skills with a focus on preparing youth for college or career.

In order to successfully transition a youth, in accordance with the three elements discussed above, a transition team will be convened consisting of the student, a parent/guardian, a social worker, a teacher, and a guidance counselor, and the team will invite any pertinent agency officials or representatives to participate in person or by phone. Coordinated activities involve both the District and the residential facility or detention center, or pertinent agency such as the New York State Office of Children and Family Services (“OCFS”), or the Suffolk County Department of Social Services (“DSS”), working together to plan for and ensure that youth involved receive appropriate support services at all stages. The District’s Transition Team Coordinator will oversee the transition planning of individual students.

To effectively involve parents and family members in improving the educational achievement of transitioning students, regular and consistent communication with the youth and family in a language they can understand must occur. Ongoing communications should include student progress toward meeting educational goals, suggestions for activities that will assist the students and families in meeting goals, and guidance in the establishment of relationships with community organizations and resources. The District’s transition team shall seek out relevant funding for transition services, including but not limited to Title I, Part D funding, which reflects current and anticipated future demand.

Ref:

CR 100.2(ff)(a)(2)

CR 100.2(ff)(a)(2);

Enrollment of youth released or conditionally released from residential facilities.

1. It shall be the duty of the board of education and the superintendent of schools of each school district to ensure:
 1. that any youth presented for enrollment who is entitled to attend the schools of such district pursuant to Education Law, section 3202 and who is released or conditionally released from a residential facility operated by or under contract with the Office of Children and Family Services, the Office of Mental Health, the Office of Mental Retardation and Developmental Disabilities or a local department of social services is promptly enrolled and admitted to attendance in such district, and that school district personnel cooperate with such facilities and agencies in facilitating such prompt enrollment;
 2. that the youth's educational records are requested from the school such student attended while in the residential facility; and
 3. where applicable, that the educational plan for such student's release or conditional release, as submitted to the family court pursuant to Family Court Act section 353.3(7)(c), is implemented.
2.
